is accepted for repairing, rebuilding, coating, sealing and resurfacing worn areas, and also as a protective coating of new parts, of machinery and equipment installed or to be installed on ships classed by RINA, within

RINA carries out its duties through officers or other persons it considers possess all the requirements of suitability and competence for the tasks which have been assigned to them. In its capacity as expert RINA only expresses opinions and evaluations of compliance with its own rule requirements and does not, in any cases whatsoever, (even if its opinions are requested on matters not expressly covered by Rules) assume the liabilities pertaining to the designers, shipowners, builders, test inspectors, shipyards or any person or organization responsible by law or contractually for providing guarantees for all of whom the respective liabilities remain unchanged even in the case of consultative actions by RINA. For what concerns the tasks taken on and carried out directly, other than those delegated, dealt with in the following sentence, RINA is answerable in law terms. Within the context of the tasks under the responsibility of RINA as delegate of the Italian Merchant Marine Ministry, liability can only be recognized in the case of fraud or gross negligence by the officers or the persons entrusted. In no case shall the liability, regardless of the amount of damage reported, exceed a value equal to 5 times the total of the fees received by RINA as consideration of the services rendered from which the damage reported derives.

RINA

STATEMENT N. CEI/108900
pag. 2 of 2

the framework of application, technical and physical properties, chemical resistance and operating temperature given by the manufacturer.

The application of the above compounds is not deemed to increase the strength of any item and is therefore accepted where the strength of the item itself is not impaired.

The applications are to be carried out in accordance with the manufacturer's instructions under the RINA's surveyors surveillance and to their satisfaction.

Extensive repairs or repairs involving pressure containing or structural components are to be specially considered in each case and details of the proposed repair are to be preliminarily submitted to RINA for approval.

The company brochure showing the range of products, their properties and the instructions for use, duly visaed by RINA, is enclosed to this statement.
